

We are a young, dynamic and globally active company in the aquaculture industry, which is committed to environmental, social and economic sustainability in the food production of the future.

Our mission is to develop solutions for a nature-oriented industrial farming of edible fish and thus to make an efficient and environmentally friendly contribution to global food security.

Because only a balanced interaction of environment, society and economy is the key to the future of our world.

At our new headquarters in Rafz, with its own indoor recirculation facility for stocking fish (juvenile fish farming), laboratory and administration, we are looking to expand our team with immediate effect or by agreement with a motivated and committed personality as a

Fish Farmer Hatchery Pike Perch & Perch 100%

As a fish farmer in our hatchery you will be responsible for the welfare of our young fish and the sustainability of our aquaculture facility (RAS). In your main task you will look after the fish stock and take care of the seedling breeding until the appropriate stocking fish delivery to the customer.

With your friendly, open and communicative manner, you respond to the various stakeholders and also embody the company's business card as the responsible contact person.

Your area of responsibility:

- Assuming responsibility for sub-areas of production
- Independent care and rearing of our young fish
- Collaboration in the biological reproduction process (from the parents, fish eggs, larvae, to the set fish)
- Process-technical supervision of the circulation systems (e.g. maintenance of water quality, feed management, etc.)
- Recording of performance characteristics and condition of the fish as well as the RAS system (analyses, documentation, protocols, etc.)
- Maintenance and servicing of technical components hatchery
- On-call duty on weekends and during the night

Your profile:

- Completed vocational training
- Basic knowledge: Animal welfare, fish management, fish farming, water protection, feed analysis, feed production
- Professional experience in the management of a fish farm with at least 40 tons annual production (preferably in RAS facilities)
- Driving license category B and B/E (trailer) as well as experience in fish transports
- Technical experience and hands-on mentality
- Passion in handling fish and conscious use of natural resources
- Enthusiastic and reliable team player
- Resilient, patient and eager to learn personality
- Careful, precise way of working - even under time pressure
- High awareness of hygiene and quality
- Willingness to work weekends and during the night
- IT skills: very good user skills for Microsoft Office applications
- Language skills: very good German and English skills, both written and spoken

If you are interested in this interesting and varied position, please send us your complete application documents, preferably electronically by E-Mail to **jobs@ftn-aquaart.com**.
